

Please take into consideration my interest in the rejection of NAB's petition 04-160 . Satellte radio is a paid subscription service and deserves the right of programming of it's choice. This is amazing service and I expect it to grow in popularity in the near furtue with the support of listeners who cant find what hey want or cant receive what they want on free radio. Satellite radio is a great opportunity to finally receive custom programing never available before. Please reject the NAB's petition 04-160. Thank You.
